DETAILED ACTION

Applicant should not that both the specification and the claims have incorrect references to SEQ 1 and 2. For example, claim 2 references to a nucleic acid encoding SEQ ID No. 2. However, SEQ Id No. 2 is a DNA sequence not a protein. Correction is required.

For the purposes for this restriction, any reference to SEQ ID NO. 1 will be interpreted as meaning SEQ ID NO. 2 and visa-versa.

Election/Restrictions

Restriction to one of the following inventions is required under 35 USC 121:

- I. Drawn to polynucleotide, expression vectors, host cells and recombinant methods of making a polypeptide classified in class 435, subclass 320.1+.
- II. Drawn to methods of treating hyperproliferative disorders classified in class 514, subclass 12.
- III. Drawn to methods of detecting WWOX classified in class 435, subclass 6.

For each of inventions I-III above, restriction to one of the following is also required under 35 USC 121. Therefore election is required of one of invention I-III **AND** one of inventions A-C.

- A. Seq Id No. 2 or a sequence encoding SEQ ID NO. 1
- B. SEQ ID No. 30 or a sequence encoding SEQ ID No. 31
- C. SEQ ID No. 32 or a sequence encoding SEQ ID NO. 33.

For invention II above, restriction to one of the following is also required under 35 USC 121. Therefore election is required of one of invention II **AND** one of inventions A-C **AND** one of invention (1)-(10).

- (1) cancer
- (2) restenosis
- (3) primary psoriasis
- (4) angiogenesis
- (5) rheumatoid arthritis
- (6) inflammatory bowel disease
- (7) psoriasis
- (8) eczema
- (9) secondary cataracts
- (10) bronchial dysplasia

Claims 1, 11, 20-25, 32 and 39 and 61 link(s) inventions A-C. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claim 1, 11, 20-25, 32 and 39 and 61. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and

any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claim 44 link(s) inventions (1)-(10). The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claim 44. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Inventions I and [II-III] are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the polynucleotide can be used to treat a variety of different disorders and the polynucleotide can be used in the detection of WWOX.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions use different reagents and have different end results.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1642

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
